# Staff Front End Engineer

I am a front-end engineer with a deep knowledge of JavaScript, HTML and CSS. I love developing UIs for data oriented web applications. I've been working remotely since 2014.

## Experience

### SOFTWARE ENGINEER AT METABASE — SINCE 2025

Develop interactive data visualizations, custom charts, and embedded analytics solutions using React and JavaScript for business intelligence platform. Builtd responsive user interfaces enabling real-time data interaction and visualization features for enterprise customers. Enhance developer experience through CI/CD pipeline optimization with GitHub Actions, streamline build processes, and improve development workflows. Collaborate closely with design and UX teams to prototype and iterate on new product features, translating user research and design concepts into functional frontend implementations.

### SOFTWARE ENGINEER AT IMPLY DATA — 2016-2025

Work on Pivot, an exploratory visualization UI that allows for fast exploration in very large data sets. Create and maintain components libraries, build systems, tests suites. Implement interfaces based on design sketches. In-depth usage of TypeScript, React, SASS and CSS-in-JS. Technical lead on a variety of topics such as dashboards implementation, primary userflows design and implementation, and cross-team projects. Mentored junior developers through their progression.

### SOFTWARE ENGINEER AT METAMARKETS — 2014-2016

Conception and development of an analytics exploratory front-end application for the advertisement markets. Involves an extensive use of JavaScript, AngularJS and D3.js. 100% compliant with TDD and Agile methodology. Everyday use of Git (GitHub).

### FRONT-END ENGINEER AT EXPANDIUM — 2011-2014

Conception and development of a cellular networks monitoring web application, installation and maintenance of production servers. Mostly used Flex, JavaScript, Qooxdoo and AngularJS. Production and development workflows created with MakeFile, Grunt, Bower, Node, Git, SVN.

### FLEX ENGINEER AT ISHANGO — 2009-2011

Conception and development of a mathematical visualization web application, development of a 2D and 3D rendering engine in Flex and ActionScript 3.

## Education

EIGSI (École d'Ingénieur en Génie des Systèmes Industriels) 2003-2008 — Engineering/ Masters's degree in Industrial Sciences (mechanics, computer sciences, automatics, electronics… )

## Skills

- React, JavaScript, TypeScript, Bash, NodeJS, HTML, CSS, SASS, LESS, CSS-in-JS
- D3.js, OpenLayers, Moment.js, Luxon, Leaflet, OpenStreetMap
- Webpack, Parcel, NPM, Git, GitHub, Docker , Linux, Mac OS
- English (fluent and technical), french (native), german (basic)
