Senior Front-End Engineer — Data Visualization & Analytics UIs

Senior front-end engineer with 15+ years building data-heavy web applications, 10+ of them on analytics and BI products (Metamarkets, Imply, Metabase). Specialist in React, TypeScript and D3.js: interactive charts, exploratory analytics UIs and embedded analytics. Technical lead on dashboards and cross-team projects, mentor to junior engineers. Fully remote since 2014.

Experience

SENIOR SOFTWARE ENGINEER — METABASE · REMOTE · 2025 – PRESENT

- Build interactive visualizations, custom chart types and embedded analytics features in React for an open-source BI platform used by 1000+ organizations.
- Shipped "visualizer", enabling enterprise customers to streamline their dashboards creation userflow.
- Cut CI time by in half on e2e tests by restructuring GitHub Actions pipelines and build steps.
- Prototype new features with design and UX, turning research findings into production UI.

SENIOR SOFTWARE ENGINEER — IMPLY DATA · REMOTE · 2016–2025

- Core engineer on Pivot (later Imply's visualization UI), an exploratory analytics interface for sub-second queries over up to trillions of events in Apache Druid.
- Technical lead for the dashboards product and primary user flows, from design through delivery, across 3 teams.
- Created and maintained the shared component library, build system and test suites (TypeScript, React, SASS, CSS-in-JS).
- Mentored junior engineers through their promotion to mid-level.

SOFTWARE ENGINEER — METAMARKETS · REMOTE · 2014–2016

- Designed and built an exploratory analytics front end for programmatic advertising data (AngularJS, D3.js).
- Worked test-first in an Agile team.

EARLIER EXPERIENCE · 2009–2014

- Front-End Engineer, Expandium (2011–2014): monitoring web app for mobile network operators (Flex, JavaScript, AngularJS); build tooling and production servers.
- Flex Engineer, Ishango (2009–2011): mathematical visualization web app with a custom 2D/3D rendering engine (Flex, ActionScript 3).

Skills

- Core: React, TypeScript, JavaScript, HTML, CSS
- Data visualization: D3.js, custom SVG/Canvas charts, OpenLayers, Leaflet
- State & UI: Zustand, TanStack Query, Radix UI, Storybook, CSS Modules, CSS-in-JS
- Testing: Jest, Vitest, Cypress, Playwright
- Tooling: Vite, Webpack, Node.js, Bun, pnpm, Docker, GitHub Actions
- APIs: REST, GraphQL

Education

M.Sc. Engineering (Diplôme d'Ingénieur), Industrial Systems — EIGSI, La Rochelle, France · 2008
